## Technical Bulletin #11

This technical bulletin describes an ADEPT\*Editor Bridge to Astoria issue and its resolution.

---

### Issue

---

Dragging and dropping from the Document Map window can result in data loss when moving elements between two Astoria documents. ADEPT\*Editor does not process the drag and drop like a normal cut and paste, which means that it does not properly notify the Bridge of its actions.

- ◆ **Note:** This issue is visible in ADEPT\*Editor 7.0.1. Additional inconsistencies involving drag and drop will be addressed in the next release of the ADEPT\*Editor Bridge to Astoria. ◆

---

### Resolution

---

Please use one of the many Cut/Copy techniques (CTRL commands, pull-down menu commands, toolbar buttons, or right-click menu commands), followed by Paste/PasteReusable to move or copy between two Astoria documents.
