

# Technical Bulletin #18

This technical bulletin identifies required Solaris server patches that must be applied before installing Chrystal Distributed Services version 1.4 on a Solaris server version 2.6 or 2.7. These or more recent patches are required for a successful installation of the Chrystal Distributed Services software and the Java Runtime Environment on a Solaris server.

**Note:** The Java Runtime Environment is installed during the Chrystal Distributed Services installation process.

---

## Required Patches

---

Apply the following or more recent patches before installing Chrystal Distributed Services on a Solaris server:

- **Patches for Solaris server 2.6:** 105490-07, 105568-16, 105210-27, 106040-13, 105633-36\*, 106409-01\*, 108091-03 (\*required for Asian Locales and Chinese fonts)
- **Patches for Solaris 2.7:** 106980-10, 107636-03, 107081-11, 108376-03

**Note:** If additional Solaris patches are available and applicable to your installation, you should also apply those patches in addition to the patches listed in this bulletin.
